# Stoch. Interv. Risk of Symptomatic COVID−19 at Day 57

working MSM summary: $(\hat{\beta}_{TMLE} = -0.0086,\ p\text{-value} = 0)$

Stoch. Interv. Risk in Vaccinees

Shift in standardized spike protein binding antibody

Mean counterfactual COVID−19 infection risk across standardized shifts
in spike protein binding antibody levels, summarized by projection of causal
dose−response curve onto a linear working model.
